COMPANY PROFILE

Guangdong Hongyuan Home Furnishing Co.,
Ltd was established in 1997
in the town of GUANGZHOU CHINA

Our expertise lies in providing a range
of sauna products:

- Infrared saunas manufacturing
- Traditional saunas manufacturing
- Outdoor saunas manufacturing
- Electrical elements process
- Wood accessories processing

We focus on providing high-quality and affordable sauna products, with great attention to design to suit our various export markets. Our sauna cabins are designed with our customers in mind, offering a range of products suitable for people's "Family Health", along with a wide range of outdoor camping solutions and home leisure. At the heart of our business is providing strong customer service and support throughout the complete process.

More than 90% of our production is for export. Our main partners in Europe are Nordic countries, Sweden, Germany and the Netherlands. Outside of Europe, our products are sold in the U.S., New-Zealand and Australia, but we are always happy to serve customers wherever a ship can sail or an airplane can fly.

Hongyuan's automated sauna room production line is dedicated to creating your exclusive health space

At Hongyuan, we recognize that the quality and safety of sauna facilities are crucial as a vital tool for modern individuals to unwind and lead a healthy lifestyle. To ensure this, we have meticulously designed and manufactured an automated sauna room production line. It strictly monitors every production link, ensuring that every sauna cabins not only meets but exceeds your expectations.

Hongyuan's automated sauna room production line is dedicated to excellence and exceptional quality.

We pay close attention to every detail and utilise premium materials and advanced technology throughout the entire production process, from the wood selection to the panel processing, and from the wiring of the electric control box to the heater installation, to ensure a superior end product. Additionally, our production line is well-equipped to handle numerous sauna room styles and specifications in order to satisfy diverse customer demands across various application scenarios and quantities.

Intelligent Manufacturing and Enhanced Efficiency

In contrast to traditional manual production, Hongyuan's automated sauna room production line drastically increases productivity and reduces production costs. Furthermore, implementation of advanced automation equipment and technology enables us to achieve large-scale and high-precision production, ensuring that every sauna room complies with exceptional quality standards.

Additionally, our rigorous quality control procedures guarantee worry-free services.

In contrast to traditional manual production, Hongyuan's automated sauna room production line drastically increases productivity and reduces production costs. Furthermore, implementation of advanced automation equipment and technology enables us to achieve large-scale and high-precision production, ensuring that every sauna room complies with exceptional quality standards.

We also prioritize delivering dedicated customer service, with our customer-centric approach guiding our provision of not only high-quality pre-sales consultation but also faultless after-sales service. Our service team will oversee the entire process, addressing any customer inquiries or issues.

Our automated sauna production line not only ensures high-quality products but also promotes a healthy lifestyle. Our hope, through mutual effort and trust, is to establish Hongyuan as your preferred sauna room brand. Join us in the pursuit of a healthy and comfortable lifestyle.

CERTIFICATE

Hongyuan's infrared saunas, traditional saunas, and outdoor saunas have been certified by multiple organizations, including the International Organization for Standardization (ISO) and the European Union (EU). Their products have also obtained approval from FCC, CE, TUV, and ETL, ensuring that they meet the highest safety and quality standards. This means that Hongyuan's saunas are not only safe to use but also of the highest quality.

Additionally, Hongyuan provides a two-year warranty on all of their saunas, giving customers peace of mind when purchasing one of their products.

LOW EMF TECHNOLOGY

What is EMF (Electro Magnetic Fields)?

Electromagnetic Fields (EMF) are energy waves with frequencies below 300 hertz or cycles per second. The electromagnetic fields we encounter daily come from every day things such as power lines, radar and microwave towers, television and computer screens, motors, fluorescent lights, microwave ovens, cell phones, electric blankets, house wiring and hundreds of other common electrical devices.

Levels of electromagnetic fields (EMF) from human-made sources have increased steadily over the past 50-100 years. Most EMF exposures come from increased use of electricity and new technologies. In the past decades, potential adverse effects from EMF exposure on human health have been an important topic of research. In fact, in California, the California Public Utilities Commission (CPUC) created the California Electric and Magnetic Fields (EMF) Program to research and provide education and technical assistance on the possible health effects of exposure to EMF.

Some health effects linked with EMF are:

Memory Loss
Depression
Loss of Energy
Irritability
Inability To Concentrate
Weakened Immune System
Chronic Fatigue
Headaches

Combining sauna and yoga provides an unparalleled trifecta of physical and mental health benefits. Detoxification, stress reduction, improved circulation, weight loss, increased flexibility, and optimized sleep quality are just a few of the rewards these activities offer. The practice of sauna and yoga is a deeply personalized path to wellness. Whether you're a seasoned yogi or new to sauna therapy, short daily sessions can deliver remarkable results. Utilizing the latest infrared technology, these sessions are designed to induce deep perspiration and a more complete detoxification effect. The popularity of sauna and yoga has exploded due to their comprehensive approach to total well-being. Yoga's mindfulness techniques provide stress reduction and relaxation, while also improving skin complexion and circulation. Sauna therapy offers self-care opportunities, further enhancing the mind-body connection.

ABOUT INFRARED

DISCOVER FAR INFRARED

In 1800, German physicist "Herschel" discovered that the infrared in sunlight is surrounded by a light source that cannot be seen without the use of a telescope. The frequency range of "far infrared" is 5.6 to 1000 μm . When exposed to this light source, the organism will be affected by radiation, penetration, absorption, and resonance. This heat-induced penetration stimulates smooth blood flow and micro-vascular tissue growth, which in turn speeds up the body's metabolism and healing process.

In the 20th century, the national aeronautics and space administration (NASA) of the United States began looking at how humans lived aboard spaceships. It primarily focuses on the conditions necessary for human survival in spacecraft in the absence of gravity, weightlessness, and extremely low temperatures. Further proof that organisms need the far infrared photons of sunshine, with wavelengths between 6 and 14 microns, was supplied by this study. Infrared light can benefit the human body by permeating its interior by 15 cm and reaching a depth of 6-14 microns.

Infrared technology has been utilized in baby incubators for close to 50 years. Also, infrared has a role in the prevention of several diseases that affect the human body. As a result of its ability to permeate the body and exert an anti-inflammatory impact, far infrared radiation is more frequently used in the medical field. Far-infrared light waves constitute the foundation for many beauty businesses' current products.

How does infrared beneficial to us?

When infrared rays permeate the body over 1-1/2 inches during conversion, the muscle tissues and internal organs are deeply heated without placing an undue strain on the heart. Our body uses perspiration, a natural cooling mechanism, to respond to the increased heat. The removal of acid and waste residue from the cells occurs during the perspiration process. This waste residue includes toxins, sodium, alcohol, nicotine, cholesterol, and potentially carcinogenic heavy metals. Enjoy the infrared sauna's unparalleled capacity to remove accumulated waste while you unwind.

Is infrared safe?

Infrared rays are considered to be safe for everyday use. Infrared rays are part of the sun's natural electromagnetic radiation spectrum and are present throughout our environment. The radiation that is emitted by infrared saunas is much lower than that of the sun, making them safe to use as part of a wellness routine. Furthermore, infrared rays can penetrate the body and induce a positive effect on the cardiovascular system, as well as reduce stress and provide other health benefits.

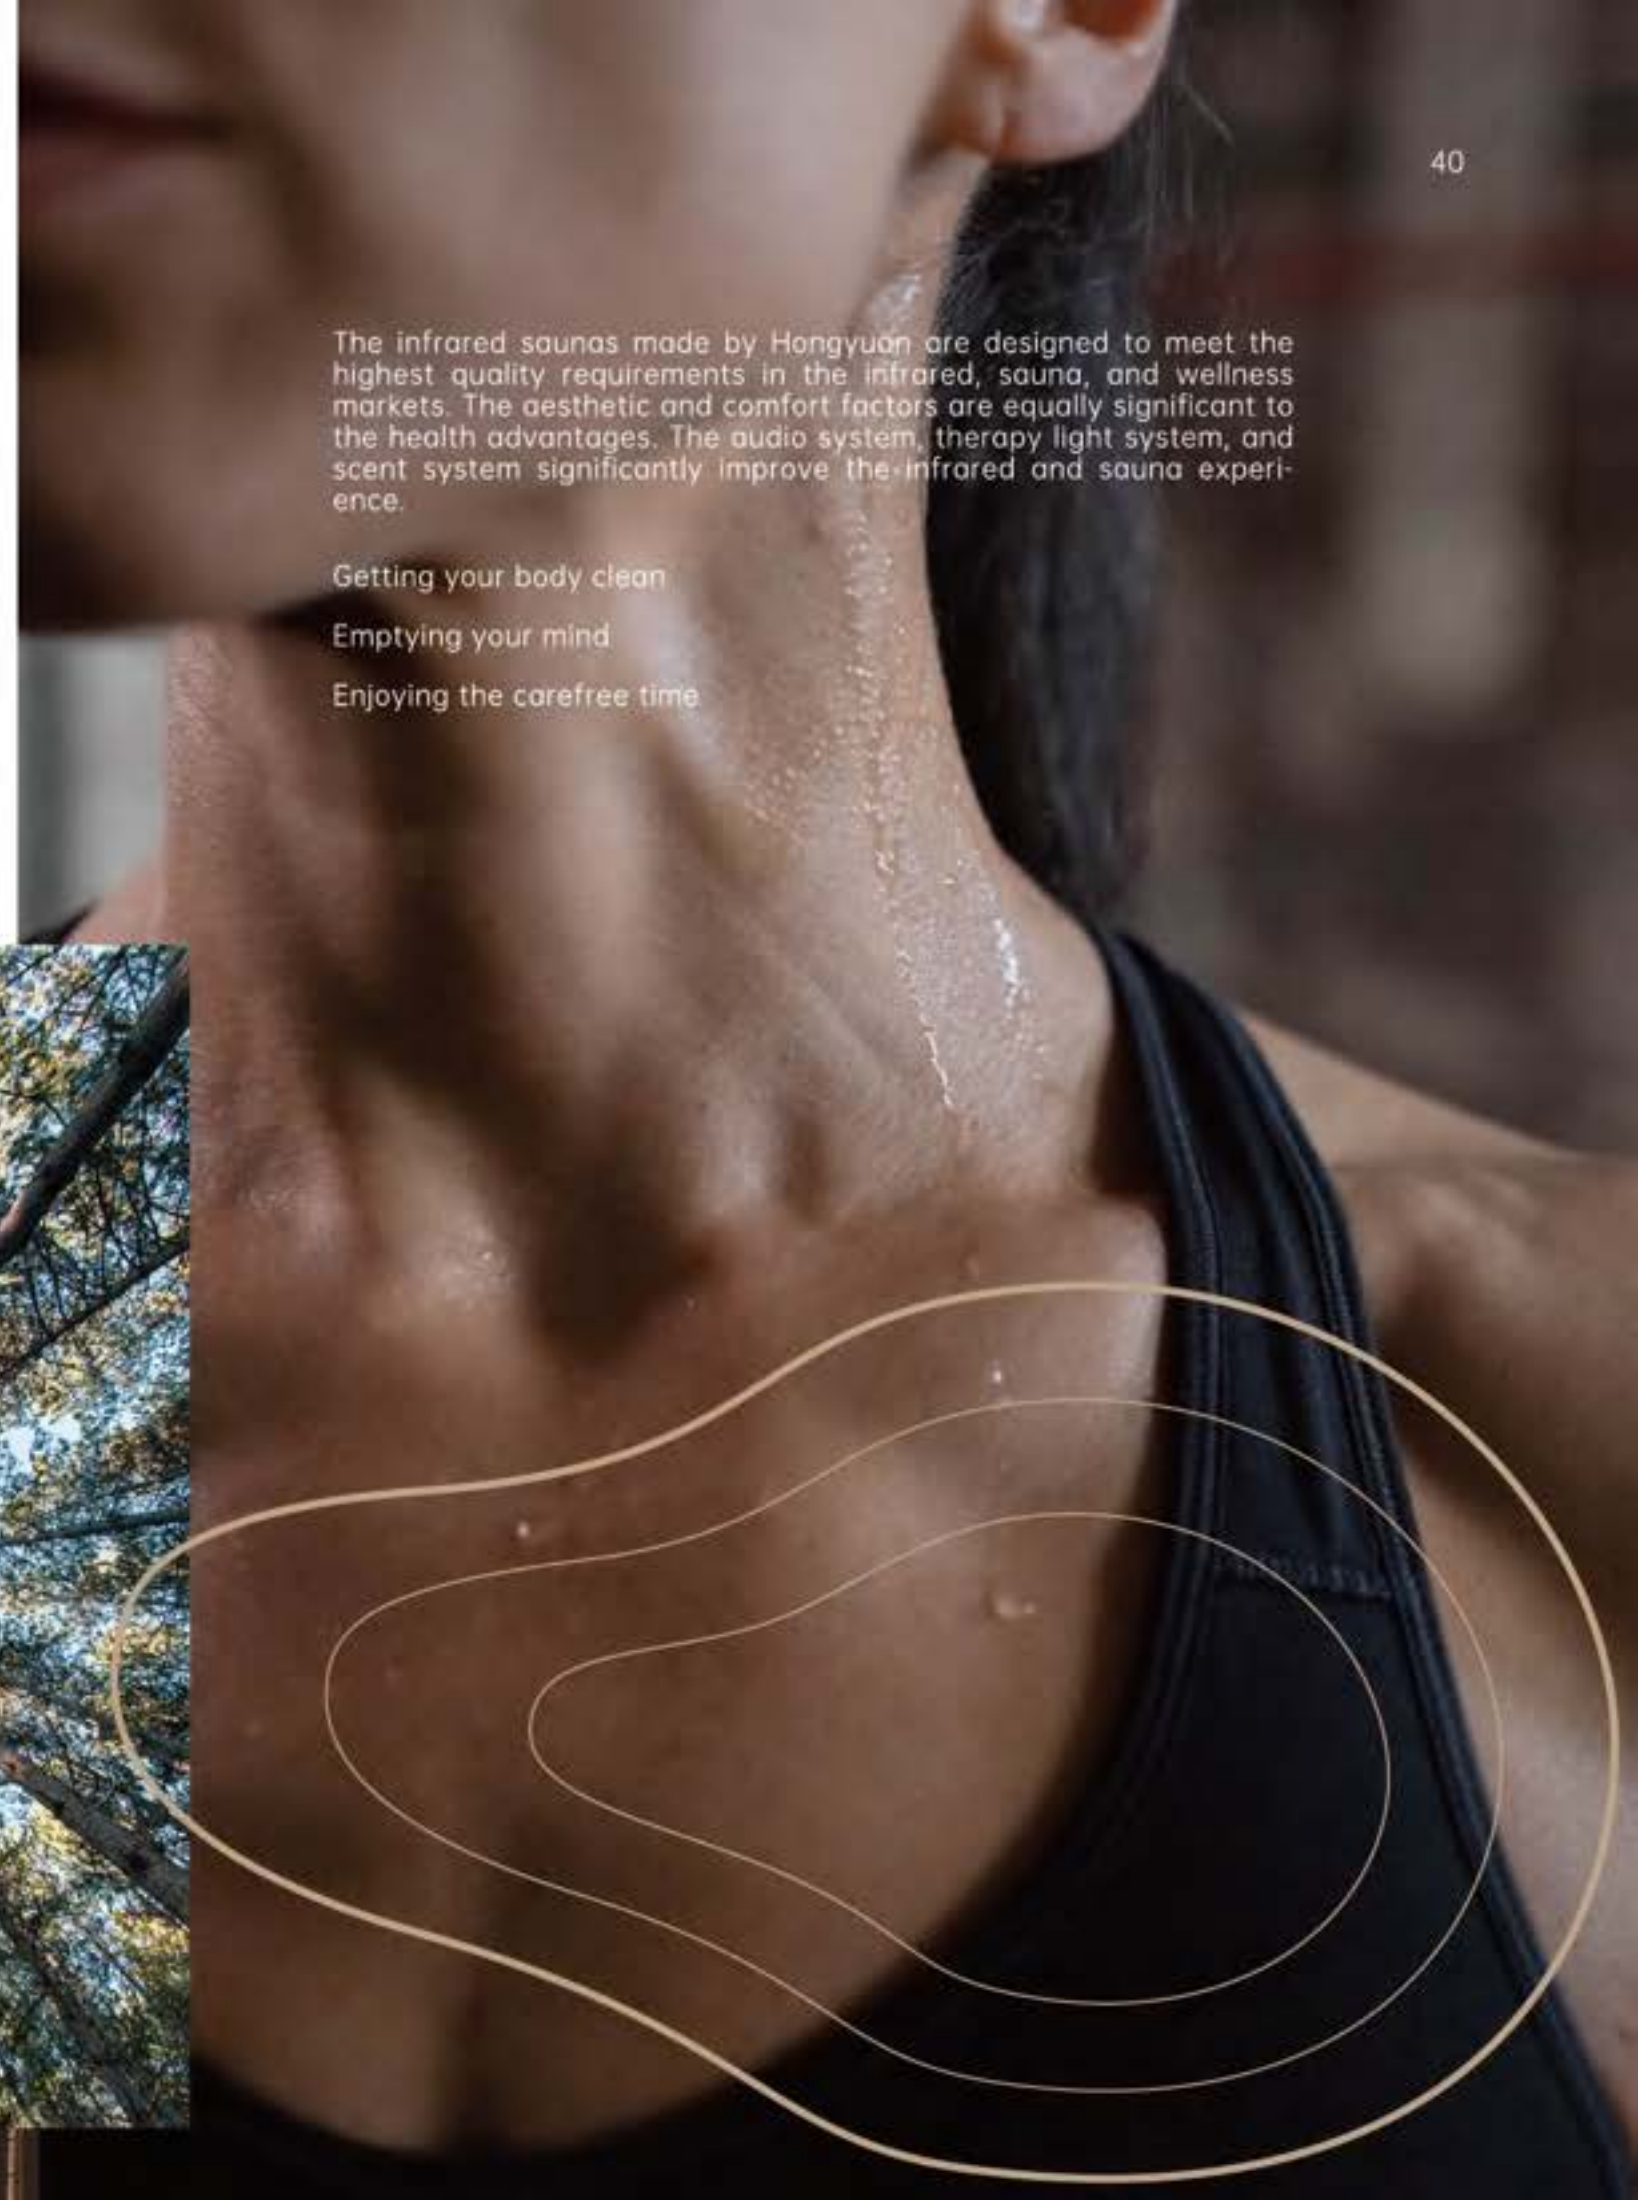

The infrared saunas made by Hongyuan are designed to meet the highest quality requirements in the infrared, sauna, and wellness markets. The aesthetic and comfort factors are equally significant to the health advantages. The audio system, therapy light system, and scent system significantly improve the infrared and sauna experience.

Getting your body clean

Emptying your mind

Enjoying the carefree time

ADVANTAGES

DETOXIFICATION

More than any other type of heat therapy or physical activity, saunas encourage the body to expel toxins such as heavy metals, toxic chemicals, and fat-soluble poisons through the pores of the skin.

IMMUNE SYSTEM ENHANCEMENT

The body temperature will briefly rise by 1 to 3 degrees F during a regular sauna session. The body uses fever as a defense mechanism against germs, microorganisms, and subsequent infections. Overall immunity is increased as a result of the generation of killer T cells by the thymus and white blood cells by the bone marrow.

RELIEVE PRESSURE

High levels of stress are caused by ongoing load on the autonomic nerve system, which is one of the perplexing causes of many chronic diseases. Your pressure could be greatly reduced by using an infrared sauna.

PAIN RELIEF AND CONTROL

Saunas help to eliminate or reduce the pain of arthritis, muscle spasms, shoulder pain, neck and back pain, sprains of any area, and reduce scar tissue and adhesions. Will rapidly increase the healing process in any non-acute injury.

CARDIOVASCULAR CONDITIONING

The human body will naturally try and cool itself as temperature increases. It does this by diverting blood from the internal organs to the extremities and skin by vasodilation. This increases heart rate, cardiac output and metabolic rate.

CELLULITE REDUCTION

Cellulite is a gel-like substance that forms in pockets beneath the skin and is made up of waste, water, and fat. It is said that excessive perspiration can remove undesirable dirt from this shape. When used in conjunction with a program that includes nutrition and massage, a sauna can effectively reduce cellulite.

SKIN CLEANING AND REJUVENATION

Saunas open clogged pores allowing for removal of dirt, oil, and makeup. In addition, there are improvements in skin problems such as acne, rashes, burns, eczema and psoriasis. Scars, even keloids, may be gradually softened.

WEIGHT CONTROL

A 15 minute sauna session is as effective for weight loss as rowing or jogging for 30 minutes. The improved blood flow to organs and endocrine glands speeds up their metabolic process, increasing caloric burn. Because fat becomes water soluble at 110 degrees F, subcutaneous fat can be released along with the sweat and to
